

ANY FINE CATTLE

Head of the Yearly
Just Purchased.

OWNS 700 HEAD

Two Years but Are
and Within a Short
Will be One of the Leading
Raising Concerns.

Cattle Company of this
owns a fine ranch at Long
every county, is growing and
The company has re-
from F. H. Butler of
is known, as the
of cattle, comprising
four hundred head of choice
which are in fine condition.

Clyatt Cattle Company is an in-
company under the laws of
and their headquarters are in
county, with range near Long Pond,
county. The company is com-
of L. J. Clyatt and T. W. Shands
city, W. W. Clyatt of Ocala,
Clyatt of Bartow Junction and
Drummond of Chiefland, the lat-
superintendent of the range.
Notwithstanding that the company has
in business less than two years,
now have about seven hundred
head of beef cattle in fine condition.
The company has a fine range of about
hundred acres and expect in a
years to rank among the leading
cattle raisers of the State.

WILL BUILD A HOME.

R. Williams Will Make a Home of
His Own Near Tampa.

J. R. Williams of Alachua, who re-
cently acquired a valuable tract of land
comprising several hundred acres in
the suburbs of Tampa, was in the city
for a few hours Tuesday.

Mr. Williams was en route to Tampa.
He was accompanied by J. W. Patton,
whom he has employed to survey and
divide into lots the tract and proposes
to make a good, lively town of his own.

"I have a great deal of confidence in
the future of Tampa," remarked Mr.
Williams. "I believe that Tampa is
going to become the city of Florida.
With its vast cigar and tobacco indus-
try, its wholesale manufacturing
interests, why shouldn't Tampa be-
come famous as one of the most im-
portant points not only in Florida but
in the South?"

Mr. Williams' property is among the
most valuable of the Tampa suburbs,
adjoining West Tampa, and there is
no doubt but that he will make a fine
thing financially from the same.

GRANGER MADE A HAUL.

Brought Eight Gamblers and Another
Offender to This City Tuesday.

Deputy Sheriff Granger made a big
haul near Komoko Monday night,
when he arrested eight gamblers and
one man charged with selling liquor in
a dry county.

The prisoners were arraigned in
Judge Mason's court, and the gamblers
were adjudged guilty and sentenced
to pay a fine of \$10 and costs or three
months in the "gang" each. Judge
Knight, the party accused of selling
liquor, was placed under a bond of \$500
for his appearance at the next term of
the circuit court, which was given.
The gamblers will be sent to the pen.

Judge Mason's Court.

Judge Mason's court was a busy
scene for a few hours Tuesday, the
case of A. D. Nelson vs. the Seaboard
Air Line Railway Company having
come before the court. The case was
a claim for the loss of two cows, al-
leged to have been killed by the trains
of the defendant company, and the
jury returned a verdict for the plain-
tiff in the sum of \$30.

The jury in the case was as follows:
D. A. Robertson, foreman; M. B.
Saunders, E. C. McMahan, A. F. Har-
rod, M. G. McCarroll, W. O. Tison.

Judge J. A. Carlisle represented the
plaintiff, while Attorney W. E. Baker
appeared for the defendant.

Kills Man on Wedding Eve.

Austin, Tex., June 20.—Sidney Law-
son, 21 years of age, who was to have
been married, killed his brother-in-law,
Walter Miles, 12 miles south of this
city, Sunday morning, and is now in
jail here. As a result of bad blood be-
tween Lawson and Miles, the latter
called at Lawson's house and told, it
is said, to get him to come out and
fight. Lawson finally came out with
two shotguns and began firing killing
Miles almost instantly, then came to
Austin and surrendered.

Best Cough Syrup. Tastes Good.
Use in time. Sold by druggists.
CONSUMPTION

THE HEATHEN ESKIMO.

He Is Good Humored With His Queer
Customs and Beliefs.

Professor Mylius Eriksen, writing of
the heathen Eskimo in northern Green-
land, says: "He lacks imagination, but
his powers of observation are very
acute. In spite of the fact that his life
is an uninterrupted struggle for exist-
ence the Greenlanders are always in a
good humor, and his boisterous laugh
can be heard sounding far over ice and
snow fields. His way of telling stories
is short and abrupt, but comical fea-
tures are strongly emphasized. His sto-
ries consist generally of his own ad-
ventures, old legends about fights with
neighbors and wild animals, about se-
vere winters and great famines, about
the creation of the world and about
supernatural beings. It is considered
highly creditable to be able to tell sto-
ries so long that the audience is lulled
to sleep. An orator who achieves this
feat is solemnly welcomed on the next
morning, and every one thanks him
profusely for the pleasure which he ac-
corded the night before.

"Ideas of beauty are peculiarly devel-
oped in the heathen Eskimo. He re-
gards beauty solely from the stand-
point of utility. For instance, a rock
projecting out of water only appears
beautiful to him when it is visited in
summer by water birds which breed
there. A foaming torrent is only beau-
tiful if it contains many salmon. Cloths
are not put together with any idea of
regularity of color, only their
practical utility being considered. Huts
are made of snow and stones, with
domed tops, but without any architec-
tural design.

"Only the spirit conjurers (angakoks)
occupy an exalted position, being re-
garded as priests and doctors. Their
task is to establish a connection be-
tween the visible world and the hidden
spirits, and in this way they obtain a
certain influence over their neighbors.
The angakok asks his spirit for ad-
vice and then informs the invalid that
his illness has been sent by the spirits
as punishment for certain deeds."

A TALE OF TWO SCOUTS.

Narrow Escape From a Rattler and
a Band of Indians.

In Cyrus Townsend Brady's "Indian
Fights and Fighters" is a tale of two
scouts, Trudeau and Stillwell, who
carried to General Carpenter through
an Indian infested country the news
that Major Forsyth was being besieged
in the sands of Beecher's Island by a
thousand warriors. Here is one inci-
dent of their journey:

"During this day a large party of
scouting Indians halted within 100 feet
of the wallow where the scouts were
hiding. Simultaneously with their ar-
rival a wandering rattlesnake made its
appearance in front of the two scouts,
who were hugging the earth and ex-
pecting every minute to be discovered.

"In his way the rattlesnake was as
deadly as the Indian. The scouts
could have killed him easily had it not
been for the proximity of the Chey-
ennes. To make the slightest move-
ment would call attention to their hid-
ing place. Indeed, the sinister rattle
of the venomous snake before he struck
would probably attract the notice of
the alert Indians. Between the sav-
age reptile and the savage men the
scouts were in a frightful predicament,
which young Stillwell, a lad of amaz-
ing resources, instantly and effectually
solved.

"He was chewing tobacco at the
time, and as the snake drew near him
and made ready to strike Stillwell
completely routed him by spitting to-
bacco juice in his mouth and eyes and
all over his head. The rattlesnake fled.
He could not stand such a dose. The
Indians presently moved on, having
noticed nothing, and so ended perhaps
the most terrible half hour the two
men had ever experienced."

The Onion.

The value of the onion in the dietary
has been made the subject of much
doggerel verse. All agree that health
and beauty wait on the fragrant vege-
table.

Eat onions in May.
No doctor you'll pay.

runs one old verse, while another
promises a good complexion to the
onion eater thus:

Fresh onion and leek,
New skin in a week.

A Bad Scare.

Some day you will get a bad scare,
when you feel a pain in your bowels,
and fear appendicitis. Safety lies in
Dr. King's New Life Pills, a sure cure
for all bowel and stomach diseases,
such as headache, biliousness, consti-
pation, etc. Guaranteed at all drug-
gists; only 25c. Try them.

IMPORTANCE OF CARBON.

Without It or Its Equivalent We
Could Have No Arc Light.

The electric arc light as now so com-
monly used is produced by the passage
of a powerful electric current between
the slightly separated ends of a pair of
carbon rods, or carbons, about twelve
inches long and from three-eighths to
one-half inch in diameter, placed verti-
cally end to end in the lamp. The
lamp mechanism is so constructed that
when no current is passing the upper
carbon, which is always made the posi-
tive one, rests upon the lower by the
action of gravity, but as soon as the
electric current is established the car-
bons are automatically separated about
an eighth of an inch, thus forming a
gap of high resistance in the electric
circuit, across which the current is
forced, resulting in the production of
intense heat. The ends of the carbons
are quickly heated to brilliant incan-
descence, and by the burning action of
the air are maintained in the form of
blunt points. As the carbons burn
away, the lamp mechanism feeds the
upper one downward just fast enough
to maintain the proper separation.

The carbons are not heated equally,
the upper or positive one being much
the hotter. A small cup-shaped cavity or
"crater," ordinarily less than an eighth
of an inch in diameter, is formed in its
end, the glowing concave surface of
which emits the greater part of the to-
tal light. In lights of the usual size,
something like half a horsepower of en-
ergy is concentrated in this little cra-
ter, and its temperature is limited only
by the vaporization of the carbon. Car-
bon being the most refractory sub-
stance known, the temperature of the
crater is the highest yet produced arti-
ficially and ranks next to that of the
sun. It is fortunate that nature has
provided us with such a substance as
carbon, combining, as it does, the high-
est resistance to heat with the neces-
sary electrical conductivity. Without
carbon or an equivalent—and none is
known—we could have no arc light.—
Charles F. Brush in Atlantic.

Tax on Babies.

Extreme hot weather is a great tax
upon the digestive power of babies.
When puny and feeble they should be
given a few doses of White's Cream
Vermifuge, the children's tonic. It
will stimulate and facilitate the diges-
tion of their food, so that they soon
become strong, healthy and active.
Sold by W. M. Johnson.

The Giant's Staircase.

One of the most widely known geo-
logical curiosities in the vicinity of
Cork is a series of knobs or knots pro-
jecting from the face of a cliff. There
are sixteen of these huge projections
all together, all regularly set in the
face of the cliff, one above the other,
forming a series of such uniformity as
to give it the general appearance of a
stairway. Since time out of memory
this queer ascent and its projecting
"steps" have been known as the Giant's
Staircase.

David Brainard and Yale.

In the course of a talk on the life of
David Brainard at Longmeadow the
story of his expulsion from Yale col-
lege came out. Brainard lived in the
time of the evangelist Jonathan Ed-
wards and "the great awakening,"
with which both men were identified.
Brainard entered Yale in 1739 and was
expelled in his junior year after being
found guilty on the charge of having
given currency to the statement that a
certain tutor had no more religion than
a chair.

Consoling.

He—So your father thought I wanted
to marry you for your money? What
did you say? She—I persuaded him
that you didn't, and then he said if
that was the case you hadn't any sense.
—Detroit Journal.

If the Baby is Cutting Teeth

Be sure and use that old and well-
tried remedy, Mrs. Winslow's Sooth-
ing Syrup, for children teething. It
soothes the child, softens the gums,
allays all pain, cures wind colic and is
the best remedy for diarrhoea. Twen-
ty-five cents a bottle.

Attention, Ye Needy.
